& finitions

Notre Produit

ACRYTHERM®

Nos dalles minérales sont le fruit d'un savoir-faire unique et d'une maîtrise parfaite des matériaux. Composées à 90% de quartz, elles associent différentes granulométries de ce minéral d'exception à une résine méthacrylate haute performance, garantissant ainsi résistance et durabilité.

Chaque dalle est teintée dans la masse grâce à des pigments minéraux tels que l'oxyde de fer et le titane, offrant une palette de couleurs raffinée et nuancée. Notre formulation exclusive repose sur une base naturelle, l'ivoire, obtenue sans aucun colorant, où seule la pureté du quartz révèle son éclat. Grâce à un dosage précis, nous déclinons cette matière en une gamme harmonieuse de finitions et de teintes, alliant élégance et performance pour sublimer vos projets architecturaux.
